WORKSHEET :

Absolute Value Graphs

Sketch the Absolute Value of Each Equation

$$y = -|x - 3| + 4$$

2)

$$y = |x| + 2$$

$$y = -|x + 3| + 3$$

4)

$$y = |x - 3| - 4$$

$$y = |x + 3| - 4$$

6)

$$y = |x + 1| + 3$$

$$y = -|x - 3| + 4$$

8)

$$y = -|x - 1| + 1$$

ANSWERS :

Absolute Value Graphs

Sketch the Absolute Value of Each Equation

$$y = -|x-3| + 4$$

$$y = |x| + 2$$

$$y = -|x+3| + 3$$

$$y = |x-3| - 4$$

$$y = |x+3| - 4$$

$$y = |x+1| + 3$$

$$y = -|x-3| + 4$$

$$y = -|x-1| + 1$$

KEY CONCEPTS:

Learn to graph absolute value functions. Note this skill also requires introduction to the Coordinate Plane also in the same lesson unit. It is a useful exercise even if it is not used or employed on the exam so instructors should judge accordingly.
